

**For Immediate Release October 26, 2005**

**HANSAm**ed Adds Innovative New Temporary Crown and Bridge Material To Their Restorative Line

Mississauga, Ontario, October 26, 2005: HANSAm

ed is excited to announce the launch of Smiletemp Temporary Crown and Bridge Material to the Canadian Market. Smiletemp is the newest addition to the Smile Technologies line of exceptional cosmetic and restorative products.

This unique provisional material has a non-BIS formulation that blends a long-chain acrylic monomer with a patented non-acrylic, elastic monomer. The result is a temporary crown and bridge material that exhibits high elasticity and flexural toughness, while providing exceptional polishability and lustre. In addition, Smiletemp's non-BIS formulation leaves virtually no slimy oxygen inhibited layer once set.

HANSAm

ed is Canada's largest Direct Distributor of Pain Management, Infection Control, Cosmetic, and Restorative products and services. Priding themselves on providing exceptional technical service and innovative new products, HANSAm

ed eagerly anticipates the response from the Dental Community on this latest addition to its restorative line.
